and protection
of coasts «

ONLINE 2021

The Research Summer Camp is open to PhD students, Postdocs and Master students who are planning a PhD study. The schedule consists of plenary sessions, key note speeches and parallel group work on three topics:

TOPICS

1

Restoration of coastal wetlands and rehabilitation of ecosystem functions

CHAIR Bernd Lennartz · Haojie Liu · Sate Ahmad – Institute of Soil Physics

2

Green coastal protection –

Towards quantifying the benefits of vegetated foreshores and other nature-based solutions

CHAIR Arne Arns – Institute of Coastal Protection and coastal dynamics

3

Terrestrial-marine interactions –

A hotspot of human errors that bridge time intelligently?

CHAIR Arne Schoor – Institute of Aquatic Ecology

Each workgroup is led by one or two scientists of the University of Rostock. Depending on the outcome of discussions and group work it is the objective of the Research Camp to write on a joint paper, to identify knowledge gaps, to work on a common available database and maybe to develop a prospective research project. The Research Camp has an interdisciplinary approach and aimed at all those who are interested in coastal sciences in the broadest sense.

APPLICATION

Please fill in the [registration form](#) and send it to researchcamp@uni-rostock.de

Deadline for application: 15th July 2021
